Prepaid Travel Cards | Multi-Currency Debit Solution Companion Cards

With travel solutions that help issuers offer flexible funds, rewards, and card controls, traveling confidently just got easier. Create deeper, more loyal customer relationships with i2c's travel solutions.

Maximizing Traveler Choices

Today's traveling consumers want convenient payment options that traverse borders and currencies with ease. Issuers rely on i2c for reliable, scalable, and global solutions that create richer experiences for customers who travel abroad.

The **i2c Prepaid Travel Card solutions** make it easy for customers to plan and manage spending while abroad. Consumers can lock exchange rates ahead of time, and cards can be replaced in the event they are lost or stolen.

The **i2c Multi-Currency Debit solution** provides safe, secure access to a checking account while traveling. Issuers can achieve 'first mover' market advantage with a unique debit offer that supports multiple currencies and purses off of a single card.

Companion Cards – issued virtually or via plastics – help card or account holders easily share value while managing usage and spending.
